

bClick v3.2.3 Guide

Simplest Way to Play

In bClick, the objective is to click B's. First you unlock a B in order to click, which is the lowercase B. Then you can click the image of the B to get points. Each B has a different Name, Image, Value, and Cost. You can get to a different B by pressing the left or right arrow buttons at the bottom left of the screen. These buttons switch which B's are shown.

Layout

Version 3.2.3's layout is a three column layout. On the left is the B's, the middle is the bank, and the right is the settings. The B section is where you click and unlock the B's. The bank section is where you deposit points to get interest, and the settings section is where you can change and view the settings.

Depositing and The Bank to Get a Better Score

In bClick there is a bank where you can deposit points. Depositing points into the bank gives you interest. Every three seconds you get points according to how much interest you have. If you have 20 interest, you earn 20 points. You can also withdraw from the bank to get your money back.

Settings

These are the settings:

Username – Your username is what shows up on the leaderboards when you submit your score. It could be anything you want. It is just a display name. To change it, type a name in the box, which usually says undefined, then click Change.

Submit Score – This button submits your score to the leaderboards.

See Winners – This button opens the leaderboards page which displays who has won bClick and their score.

Soft Reset – A soft reset only resets your progress, not your achievements.

Hard Reset – Resets all your progress and achievements.

Achievements

Achievements are in bClick. They are displayed in the settings section. If the color is red, it's not unlocked. If the color is green, it's unlocked. There are achievements for earning points, having interest, clicking a lot, and unlocking B's.

More

Groupings

Grouping are a set of settings or items that can be shown or not shown when you press the '-' or '+' on the right of the group title. Achievements, Withdraw, and Deposit, all are examples of groupings.

What's NaN?

NaN means not a number. You have done something that made your points or interest into something that's not a number. This could have happened when there is an error in the game, if you deposit words, words and numbers, symbols, or anything that's not only a number into the bank, your interest being NaN, or maybe other things too. If you get NaN, do a soft reset. If that doesn't work, do a hard reset.

P.S. A secret!

If you type `Earn(999)` somewhere, you will get 999 Points. If you type `Earn(9876)` in the same place, you will get 9876 Points. And the bank is NOT where you type it. If you do, I think you will get NaN points, which means not a number, because you deposited something that's not a number.
